How to begin using parent settings?

[Follow \(/hc/en-us/articles/115007235527-How-to-begin-using-parent-settings-/subscription.html\)](#)

Any school that has signed up for the parent portal can begin using the Parent Settings. The Parent Settings allow school IT Admins to give parents control over their child's online activity at home.

Please note that the school IT Admin has control over which settings can be modified by parents, and can be changed at the Admin's discretion.

As a school IT admin, to begin using Parent Settings:

1. Log in to your Safety Console.
2. a. If you have already uploaded the parent CSV to begin sending student activity reports to parents, navigate to the 'Parents' tab in your Admin UI.
b. If you have not yet uploaded the CSV, navigate to the 'Parent' tab and upload your CSV. Once you upload the CSV, you will start seeing the Parent Settings.

Nucelus UI view

The screenshot displays the Securly Admin UI. On the left is a navigation sidebar with icons for Dashboard, Activities, Policy Editor, Policy Map, Staff, Parents, and Auditor. The 'Parents' icon is highlighted with a green box. The main content area is titled 'Parental control' and includes a sub-header 'Settings Manage Parents' which is also highlighted with a green box. Below this, there is a message: 'You have total control over which settings can be modified by parents and can change them at any time.' Four control options are presented in cards: 'No control' (Parents won't be able to manage their child's settings..), 'Restricted control' (Parents can only make the policy more strict.), 'Full control' (Parents have complete control of their child's settings..), and 'Custom control' (Parents can only control the settings you select.). The 'Full control' card is highlighted with a green border and contains an open padlock icon. At the bottom, there is a 'Report settings' section with the text 'Determine what student activity is included in parent email reports and the Securly Home live feed.'

Parental Controls

Any school that has signed up for the parent portal can begin using the Parent Settings. The Parent Settings allow school IT Admins to give parents control over their child's online activity at home. Please note that as a school IT Admin you have the control over which settings can be modified by parents, and can be changed at your discretion.

- No Control**
Parents won't be able to manage their child's settings.
- Restricted Control** (Selected)
Parents can only block sites and categories.
- Full Control**
Parents can fully control their child's settings.
- Custom Control**
You can customize what parents can manage. [Edit](#)

(For tips on how to successfully upload the CSV, refer to the article [here \(https://support.securly.com/hc/en-us/articles/228390168-How-to-minimize-upload-failures-for-CSV-files\)](https://support.securly.com/hc/en-us/articles/228390168-How-to-minimize-upload-failures-for-CSV-files).)

3. You can now begin using parent settings and giving parents control over their child's online activity at home.

As a parent, to being using Parent Settings:

1. Login to the Parent Portal by navigating to www.securly.com (<http://www.securly.com>) and logging in as a parent. (Check out this [video \(https://vimeo.com/205038033\)](https://vimeo.com/205038033) to learn more about the Parent Portal.)
2. Navigate to the 'Settings' tab.
